Organic Integrated Weed Management One Year Seeding is Seven Years Weeding

- Remove the weed before it produces seed. It is easier to weed one plant today than 1,000 weeds next year.
- The soil is a reservoir of seeds, a seed bank.

How to Prevent Weed Damage

- Plant clean or certified seed
- Avoid importing manure or compost that has not been well composted or decomposed
- Crop rotation decreases the seeds of weeds that grow well with certain crops

Early weed competition reduces quality and yields
